Sample Pdf for testing-Purpose

This document is used for only   testing-purpose. AOSP pdf viewer' native layer unit tests will use this pdf document to perform some tests.

A word with punctuation - A. Bbbb. We will use this to search for a word having punctuation and the punctuation should not be ignored

Examples of word with hyphens - wide-area, x-y etc
If we will search for these words with hyphens, they should be found and hyphens should not be ignored

Examples of line broken word - Let's say the word is 'support' and we have written it at end of a line so the word gets split for ex su-pport. So when we will search for word 'support' this instance of 'support' should also be included because we don't know if the hyphen was there or not if the line is not broken here
